- RSVP by Nov. 16 to
phone: Nancy Schumm at (847) 975-8391 or
email: coordinator@upperdesplainesriver.org
- Presentation to follow the Annual Meeting

Transforming an Urban Campus Using Integrated Green Infrastructure

Our featured speakers will present a case study on the redevelopment of an urban plaza located on the campus of Western Technical College in La Crosse, WI. This presentation will focus on holistic integrated green infrastructure utilizing best management practices. Special attention will be given to the project's green street system, developed as a pilot project within the City of La Crosse.

In addition, the presentation will review long term maintenance and how the project is eligible to earn credits within the city's stormwater utility, demonstrating a return on investment for stormwater best management practices.

Presented By:
Gary Paradoski, PE, Applied Ecological Services
Ryan Peterson, ASLA, RDG Planning & Design
